

## ***Environmental policy of company Sysco Set LTD for 2011***

The environmental policy of Syscoset Ltd was worked out, to fix the awareness of the employees for our environment and nature in all departments of the company. The policy is aimed at protecting and preventing its degradation as well as preserving the environment for the future generations.

- Beside economical and social aspects, also ecological aspects should be considered in fundamental decisions and also within the daily working routine. The protection of environment and saving or natural resources must be part of our daily work and acting.
- Control and constant monitoring of the environmental aspects that affect the environment.
- Periodic environmental review, which analyzes issues related to the environment and the impact on the environment, as well as planning actions to control and manage these environmental impacts.
- Not avoidable emissions and waste will be recycled or disposed according the national laws and regulations.
- Throughout technical and economical possibilities the environmental pollution will be reduced to a minimum.
- Achieve efficiency, expressed in measurable indicators for managing the environmental aspects.
- Continuous and constant control and monitoring of the implementation of legal regulations and documents as well as internally adopted documents for the managing of the environment.

By including the environmental needs in our daily work, as well as by information's, we would like to increase the responsibility of our workers for their environment and nature.

*Ecologically aimed thinking and acting is a challenge and goal of all our workers.*

As aims for the year 2011 we have set the following goals:

- Full separation of waste for easier recycling, till end of Q3/2011
- Effective use of electricity, end of Q4/2011
- Reduce consumption of electricity by 2% by the end of 2011
- Reduction of paper, by reviewing and collapsing documents, change to paperless q- and production system, end of 2011
- Reduce paper costs by 5% by the end of 2011

***OUR AIM MUST BE, TO LEAVE THE NEXT GENERATIONS A WORTH LIVING ENVIRONMENT!!!***
